“When I contact Integrity Schools I know that my issue will be handled quickly, accurately and honestly.”

Challenges

In districts experiencing rapid growth like Huntley District 158, data entry issues are common with incoming Kindergartners and new students. The district also had significant data latency and the data among many systems was unreliable. When information changed in one location (software application or department) the changes did not always make it to the other areas of the district. This caused a tremendous amount of time to be utilized in the verification processes. The district had done their homework and solicited vendors for solutions. A SIF solution was put in place.

The Solution

SIF software agents were used to connect Huntley’s administrative applications using a Zone Integration Server (ZIS) as the featured center of the project. The ZIS is used to pass data from the student information system, PowerSchool Premier, to the transportation, point of sale food service, library science, identification card, and the Microsoft Active Directory applications.

Integrity Schools served as the third party integration firm providing support for the installation and coordination of the vendor interaction in order to ease the burden of the school district staff. In doing so, valuable time was saved by the district in getting the system up and running. The ease of transition between old procedures and new was able to take place almost seamlessly.

Huntley has seen tremendous time savings from the integration of all of these systems over the last 4 years, but the initial deployment of SIF is what made them believers. Within a month of installation, one of the systems needed to be taken offline (out of the zone temporarily) in order to perform the necessary software upgrade to that particular software. During this time, the department’s personnel had to go back to the previous year’s procedures which were cumbersome and time consuming. The staff wanted SIF back in place as soon as possible, Integrity made that happen. Huntley School District has never looked back, knowing the investment in SIF solutions has saved hundreds, maybe thousands of hours, over the years.
