March 2, 2009

Dear Mr. Moravec,

Since June 2005, Integrity Schools (Integrity Technology Solutions) has been a SIF vendor of Naperville Community Unit School District 203. During this time, I have found them to provide the highest quality service to meet our needs. They have always met project deadlines and have been forthcoming with adjustments and corrections when necessary.

We began with a SIF project to implement integration between our student information system and our call-out system, and transportation system. Since the initial project, we have also added a data warehouse agent and data warehouse database to the SIF infrastructure.

We have always been treated as more than a customer. Integrity acts as a trusted partner in all of our SIF projects. The knowledge and professionalism of the Integrity staff makes project planning and execution much smoother and problem free. I have found them to be very approachable. If I have a time-sensitive question that needs a quick answer, I can always get in touch with the staff to get the answer I need. I really appreciate that.

I would highly recommend Integrity Schools to any school district that is planning to implement a SIF infrastructure. You will find them easy to work with and they will help make your project a success. Integrity is more than their name; it is how they do business.

Sincerely,

A handwritten signature in black ink that reads "Tracy Oliver".
