To Whom It May Concern,

It is my pleasure to write this letter of recommendation for Integrity Technology Solutions as a SIF implementer. Our interactions with the Integrity staff has been extremely positive.

TRECA is a information technology center that serves over 40 school districts in Ohio in part by providing eSIS as a student information package. When one of our districts was ready to implement a SIF solution between eSIS and Versatrans we contacted Integrity. It was a considerable advantage that the staff at Integrity had first-hand knowledge of both the eSIS and the Versatrans SIF agents. They were able to explain the process, design a plan and provide excellent technical support to both the district and to TRECA.

The staff at Integrity excels at communication, follow-thru, technical assistance and managing multiple groups of people. Jeremy Davidson, the project manager that we work with, has been exceptionally helpful guiding both the district and TRECA with our implementation. It has been so successful that, five days after we got the first district up and running in SIF we had the second district up and running in a few hours.

We plan to continue recommending Integrity Technology Solutions to our consortium school districts as we move more districts into SIF solutions. Please contact me if you would like more information about our relationship with Integrity.

Sincerely,

Jennifer Schmidt
Assistant Director, Data Services
